UK
Apr 2024

Technical Skills & Projects

Programming Languages: HTML5, CSS3, JavaScript (ES6), MATLAB

Framework: Tailwind CSS (utility)

Library: React.js (frontend), Redux (centralized state)

Version control: Git (CLI) and GitHub (remote repo)

Languages: Spanish (native), English

Others: Typesetting in $\text{\LaTeX}$ and drawing in Inkscape

Shoes Landing Page

Developed a landing page of shoes that make the user experience very free-flowing when shopping. The front end of the software was created using React. Additionally, Tailwind CSS was used to style the UI. The states was managed with the Redux library.

Feb 2026

TaskChecker

Built a to-do list that makes scheduling tasks easy. The front end of the software was created using React and some of its libraries. Additionally, Tailwind CSS was used to style the UI. (Still in Alpha Version).

Jan 2026

React and Tailwind Project

Explored the React library by creating modules (such as a dynamic text, a responsive input, and a stylized button), and the webpage was styled with the utility framework Tailwind.

Dic 2025

The Lionel Messi's Life and Career

Created an article as a tribute to Lionel Messi. This project was primarily designed using Tailwind CSS, and the data is contained in objects to display it using array methods.

Nov 2025

Roman Numeral Convert

Designed a web application to convert integer number into Roman numeral by using JavaScript. This project also has some animations by using the transition property and the "keyframes" rule in CSS.
